Education

Mobile Application Development
Postgraduate Studies
PUC-PR | 2024 – Present

Scientific Initiation Scholarship (PIBIC)
Undergraduate Research – Process Mining
PUC-PR | 2021

Computer Science
Bachelor's Degree
PUC-PR | 2020 – 2023

Skills

C# .NET

React.js

SQL Server

Go
Java (Spring Boot)

Professional Experience

Full Stack Developer
Sumersoft Tecnologia
March 2023 – Present

- Led the development and maintenance of LMS, a web-based loan management system, ensuring high performance and reliability across the .NET (C#) backend and React.js frontend
- Implemented database adjustments to enhance data consistency, significantly reducing reporting discrepancies.
- Engineered automated weekly/monthly reports, greatly improving data accessibility and eliminating extensive manual compilation efforts for key stakeholders. Also identified and resolved critical errors in existing reports, boosting data accuracy and reliability for business analysis.

Backend Intern
Celepar
June 2022 – February 2023

- Contributed to the development and testing of internal management systems, primarily using Java (JSP) and PostgreSQL for state-level applications. Focused on implementing bug fixes and maintaining functionalities
- Significantly advanced my Java backend development skills and sharpened key soft skills through focused training, directly improving my contributions to team and project success
- Gained practical experience with the MVC design pattern, contributing to a robust codebase while understanding its principles in real-world applications
